EDUCATION

Vanderbilt University

Nashville, TN

B.S. in Computer Science & Applied Mathematics | Minor: Engineering Management

Expected May 2028

GPA: 3.9/4.0

Relevant Coursework: Data Structures, Engineering Management Principles, Intermediate Software Design, Differential Equations, Linear Algebra, Multi-Variable Calculus, Probability and Statistics, Algorithms, Computer Architecture

TECHNICAL COMPETENCIES

Programming & Scripting: Java, Python, HTML, Git/GitHub, C++, Qiskit, C, ASM, SQL

Automation & AI Tools: Claude Code, Microsoft Power Platform, Cassidy AI, Lovable, Gemini, Figma Make

Operating Systems & Development Environments: Databricks, Linux, macOS, IntelliJ IDEA, CLion, VS Code

PROFESSIONAL EXPERIENCE

ADM Investor Services

Chicago, IL

Incoming Software Development Intern

May 2026 – Present

- Built and deployed a machine learning pipeline in Databricks to forecast margin calls, leveraging Scikit-learn and Mlflow to transform large-scale financial data and iteratively improving model performance in a scalable big data environment.

SoftSnow.ai

Chicago, IL

AI Intern

May 2025 – June 2026

- Analyzed AI integration opportunities and risks while designing and automation workflows using Cassidy AI and Zapier to support data-driven decision-making.
- Achieved Claude Certified Architect Certification through demonstrated strength in AI workflow implementation and Claude usage.

Citi Bank Early Identification Program

Chicago, IL

Quantitative analysis

March 2026 – April 2026

- Partnered with Citi mentor specializing in internal rates library to gain hands-on exposure to quantitative analysis tools; supplemented by professional sessions on business fundamentals and mock interview training

Beats by Dre Data Analytics

Culver City, CA

Extern: Qualitative and Quantitative Insights

November 2025 – February 2026

- Leveraged natural language processing tools like Gemini AI and ChatGPT to generate qualitative consumer insights, while using statistical analysis methods such as linear regression and mean, median, and mode comparisons to identify quantitative trends in wireless speaker consumer feedback.

Vanderbilt University, Professor Gerald Roth

Nashville, TN

Teacher Assistant, Program Design & Data Structures Courses

August 2025 – January 2026

- Grade programming assignments and exams with consistent academic standards, utilizing debugger tools to analyze and debug object-oriented code.

Chippewa Ranch Camp

Eagle River, WI

Program director, Activity Director, and Counselor

June 2021 – August 2025

- Managed evening programs for 300+ campers and counselors, overseeing staffing, budget, and supply coordination.

LEADERSHIP & PROJECTS

Vanderbilt Quantum Initiative

Nashville, TN

Project Manager

September 2025 – Present

- Implemented Quantum Amplitude Estimation in Qiskit to price European, American, and Asian options, achieving quadratic speedup over classical Monte Carlo and benchmarking against CRR binomial lattice models across configurable Black-Scholes-Merton parameters.
- Led project coordination and task delegation across the team, delivering a full-stack interface for real-time quantum option pricing targeting IonQ Forte hardware via hardware-authentic quantum circuit implementation.

Delta Delta Delta Fraternity

Nashville, TN

Director of Administration

September 2025 – Present

- Serve as primary liaison with national representatives by submitting required reports and communications.
- Developed, deployed, and maintained a chapter website in VS Code, using Git to manage version control and synchronize updates with the Lovable-hosted platform, creating a centralized hub for announcements, documents, and resources for a 200+ member organization.
